Colombo, sri lanka

***According to Marxian class theory there is a two great classes directly facing each other":**

1.Capitalists, or bourgeoisie, own the means of production and purchase the labor power of others

2.Workers, or proletariat, do not own any means of production or the ability to purchase the labor power of others.

Rather, they sell their own labor power.

Communism said - workers and capitalists are struggles with each others

(class struggle)

Only social change can be a solution for class struggles believe by communist peoples. they think communism will birth by class struggles and labor revolution. but one mistake in communism called self employment. yes ! Communism said that only two(2) classes labor and capitalist are in the world. but

they miss one class and made a mistake. That social class called self employment or self employee.in self employment they are labors,they are capitalists.for example- taxi driver(taxi owner and driving it as a labor for earn money)in self employment there is No class struggles so communism not birth in there,revolution will not

happen.so communism will
not match for self
employees.communism is
deficiency
ideology.communism is fail.
